THE WORLD'S FIRST
SUSTAINABLE DESTINATION

S.T.A.R. ISLAND™

ELEUTHERA • BAHAMAS

INCREDIBLE COMFORT, SURPRISINGLY GREEN.

WELCOME TO STAR ISLAND

STAR Island delivers a unique off grid experience without compromise. A private island destination seamlessly combining the latest Earth-friendly construction and design with an exclusive resort experience. A pure paradise where every detail has been artfully designed in harmony with our natural environment.

A TRUE ESCAPE

Step into a one-of-a-kind, private island destination that will change your idea of sustainable living. The STAR Island staff will be awaiting your arrival to escort you to a nearby dock where you will be transported to our hidden island. Minutes later, step onto the shore of this secluded oasis, where 35 acres of exquisite landscape, pristine beaches and over 9000 feet of sublime shoreline are yours to explore.

THE VISION

To provide the world's first sustainable island destination, where desirable experiences and environmental care intersect.

YOUR RETREAT

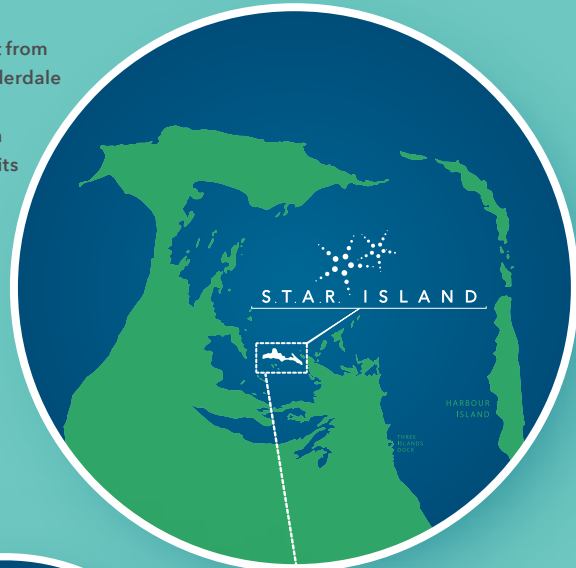

STAR Island features exquisite, all-waterfront private lodging options to its guests. From single cabanas, bungalows and treehouses to the larger villas – every option boasts generous outdoor living areas, with all the amenities of modern life created in an environmentally-conscious design.

✧ Under 1 hour flight from
Miami and Ft. Lauderdale

✧ Minutes away from
Harbor Island and its
pink sand beaches

✧ Only 73 miles
from Nassau

ESCAPE.
EXPERIENCE.
ENJOY.

OUR STORY

In 2006, founder David Sklar and his young son Vail took a small fishing boat from Harbour Island, across the crystal clear sea to the shores of an untouched paradise. It was love at first sight. The idea of leaving a legacy of care for the environment to his son while creating a first-of-its-kind project inspired David.

Out of his passion and commitment to protect this Caribbean jewel grew the idea to create the world's first sustainable island destination with unparalleled guilt-free comfort. At first, it seemed like an impossible dream. With the help of other like-minded individuals who brought their dedication and expertise into the project the dream, against incredible odds, finally became a reality. A STAR was born.

COMPLETELY GREEN

STAR Island is a working prototype for sustainable living, making ongoing efforts to consistently document and improve practices and products. Visitors will have first-hand opportunities to see clean energy systems in use and learn about how they actually work. Solar, wind and hydro systems are in place, delivering a true carbon-neutral operation. Our staff is always available to tour guests throughout the island, explaining how everything from aquaculture to architecture is contributing to making this island a viable model for our planet.

Special efforts are made to designate areas on STAR Island for the advancement of sustainable practices. Ideas will be exchanged through our partnerships with our members, guests, foundations and universities. Our findings will be made available to all people interested in promoting green initiatives.

STIMULATING PLAY

Our amazing shoreline and azure waters create the ideal setting for our guests to enjoy the trip of a lifetime. A spectacular array of diverse activities like bone fishing, kayaking and paddle boarding make the waters off of STAR Island perfect for any level enthusiast. Our breathtaking beaches provide the ultimate tropical escape. Whether enjoying dining, dancing under the stars or venturing to the famous pink sand beaches of neighboring Harbour Island, your memories are certain to be unforgettable.

RELAX

For centuries, STAR Island remained uninhabited and virtually hidden in a protective aqua-blue sound off the Bahamian coast of Eleuthera. The tranquil surroundings are perfect for unwinding and reconnecting with both nature and each other. The peaceful rhythm of STAR Island will wash away any lingering thoughts of the outside world.

TASTE

Awake your senses with the flavors, scents and textures of the lively Caribbean cuisine. The celebrated local seafood is the star of our freshly-made menu.

STAR's fresh produce is primarily sourced from the island's own organic and hydroponic gardens, where herbs, fruits and vegetables are grown with respect for nature and its resources.

EXPLORE

Enjoy unforgettable encounters with nature's simple perfections. From reefs teeming with life to exotic blue holes, the ocean is yours to explore. See the lush plant life and the small creatures native to the Bahamian islands. Take advantage of unique opportunities to be part of the STAR Island project and participate in activities from hydroponic gardening to artificial reef building. Learn sustainability by experiencing it, and create a meaningful connection to the island and our planet.

A NEW KIND OF MEMBERSHIP

Our membership is designed to include rather than exclude. By creating a unique type of membership which delivers exceptional service to members and invites them to return with friends and family, we encourage our members to share their experience with others. The island will be ever-evolving, showcasing the latest in desirable, sustainable living.

STAR's exclusive concierge member service will ensure an experience that is tailored to you. With a varied menu of activities and services, your preferences will be our priority, creating the ultimate personalized escape every time.
